

Cleaning and Sanitizing Services

Miracle Playsystems has an in-house maintenance technician to suit all of your maintenance needs. We offer a full line of personalized support to assist our clients with the management of their playground safety which includes cleaning and sanitizing. Maintaining safe play areas is a big part of our business and it will keep your playground looking wonderful for years to come.

Pressure Wash Cleaning

Cleaning and sanitizing services are now available to our clients to not only help with safely re-opening playgrounds during and after the pandemic but to clean and freshen up equipment as well. Our team is equipped with a Brand-NEW Trailblazer commercial pressure washing system to thoroughly clean your equipment.

Sanitizing Services

After the equipment is cleaned, we move on to sanitizing. We use the most powerful electrostatic disinfectant sprayer on the market to apply EPA and CDC approved disinfectants with electrostatic charge to fully coat and disinfect the entire play area.

The World Health Organization (WHO) has concluded that hospital-grade disinfectants such as V-Guard™ will neutralize and kill viruses, including the Wuhan Coronavirus (COVID-19) immediately upon contact, thereby eliminating the risk of infection and spread in treated areas.
